In re application of: Betz

Atty. Docket No.: UCC-001-A

Serial No. 10/679,894

Art Unit: 3749

Filed: October 6, 2003

Examiner: Harold Joyce

For: MULTI-SEASON CRAWL SPACE VENT

RESPONSE TO RESTRICTION REQUIREMENT

Commissioner for Patents P.O. Box 1450 Alexandria, VA 22313-1450

Sir:

In response to the non-final Office Action mailed March 23, 2004, in which the Examiner made a restriction requirement, applicant hereby elects the species of Figures 1-13 identified by the Examiner, subject to the allowability of any generic claims.

As required, applicant lists the following claims as being either generic or readable on the species of Figures 1-13: 1 (generic), 2-17, 20 (generic), 21.

Applicant notes that the Examiner's characterization of claim 21 as generic appears to be incorrect, since it recites a rear frame inserted through the front frame. Applicant also submits that claim 1 is generic, and that the Examiner is incorrect in the statement that "the embodiment of Figures 1-13 does not have tension members being operable by a person outside as specified in claim 1." The specification describes, for example at paragraphs 0047 and 0055, that the tensioning of the rear frame is accomplished by a person outside the crawl space, reaching through the vent opening and installed front frame to position and tension the rear frame using wingnuts 24c, 124c. Applicant believes that the Examiner may have

mistaken the front venting plate/receiver securing nuts such as 26e in Fig. 1 or 125c in Fig. 5 for frame tensioning means, and correspondingly misunderstood the limitation of claim 1 as it applies to the species of Figures 1-13.

Applicant believes that this election is fully responsive to the restriction requirement, and respectfully submits that the application is now in condition for examination on the merits. Any questions should be directed to applicant's undersigned attorney at 231-932-9752.

Respectfully submitted,

Jason Young, Reg. No. 34,048
